

# Inclusive Education

Berkeley High School serves approximately 300 students with Individual Educational Plans (IEPs). Inclusive Education services at the high school meet the diverse requirements of students with a wide range of learning needs, from mild to moderate learning disabilities to severe cognitive and physical differences. In accordance with the mandate to provide the least restrictive environment for all students, special education staff members provide students with the most inclusive program possible. Special education teachers collaborate with and support general education teachers. All programs and small schools are able to meet the needs of all students with IEPs, and educational specialists work with the staff of each small learning community to make the curriculum accessible. Special educators teach literacy, math and study skills with the twin goals of increasing student success in general education and of promoting independence. Students' school programs are designed through the IEP process and may include single or multiple periods of inclusive education support.

## Courses for students with Severe Disabilities

**INE COMMUNITY TRANSITION**  
**INE WORK SKILLS**  
**INE LIFESKILLS MATH**  
**INE LIFESKILLS SOCIAL LIVING**
